Internet of Things Industry trends

Agenda

Workshop Agenda

STMicroelectronics

The IoT Movement

COVID-19 accelerated Adoption

Industry Projects

STMicroelectronics

We are creators and makers of technology

One of the world's largest semiconductor companies

48,000 employees of which
8,400 in R&D

\$12.8 billion revenues
in 2021

Over **80** sales & marketing
offices serving over **200,000**
customers across the globe

14 manufacturing sites

Signatory of the United Nations Global Compact (UNGC)
Member of the Responsible Business Alliance (RBA)

Our strategy stems from key long-term enablers

Smart Mobility

Helping car manufacturers make driving safer, greener, and more connected for everyone

Power & Energy

Enabling industries to increase energy efficiency everywhere and the use of renewable energy

Internet of Things & Connectivity

Supporting the proliferation of smart, connected IoT devices with products, solutions & ecosystems

The IoT Movement

Why do we need intelligent smart systems?

Urbanization

Demographics

Environment

How is the industry addressing these challenges and opportunities?

An ecosystem of industries

Cloud industry

Lower barriers to create new services

Semiconductor industry

Lower barriers to develop products

Telecom industry

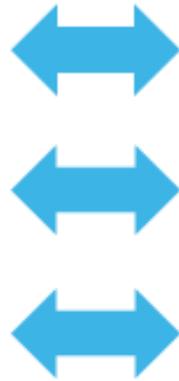

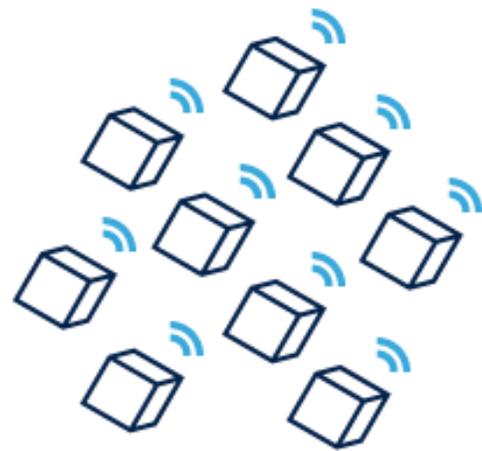

Lower barriers to be connected

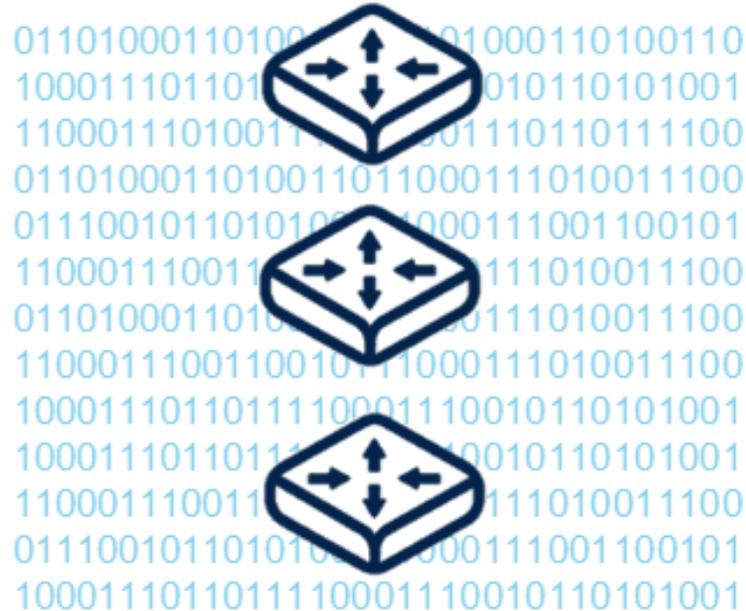

Smart System Challenges the “Traditional” Centralized Approach

Collect and Send Data

Protocol Translation and
Device Management

Big Data and
Heavy computation

Smart System Challenges: Constraints of Centralized Data Processing

Time-sensitive applications are limited by remote cloud connections

Privacy and Security Considerations

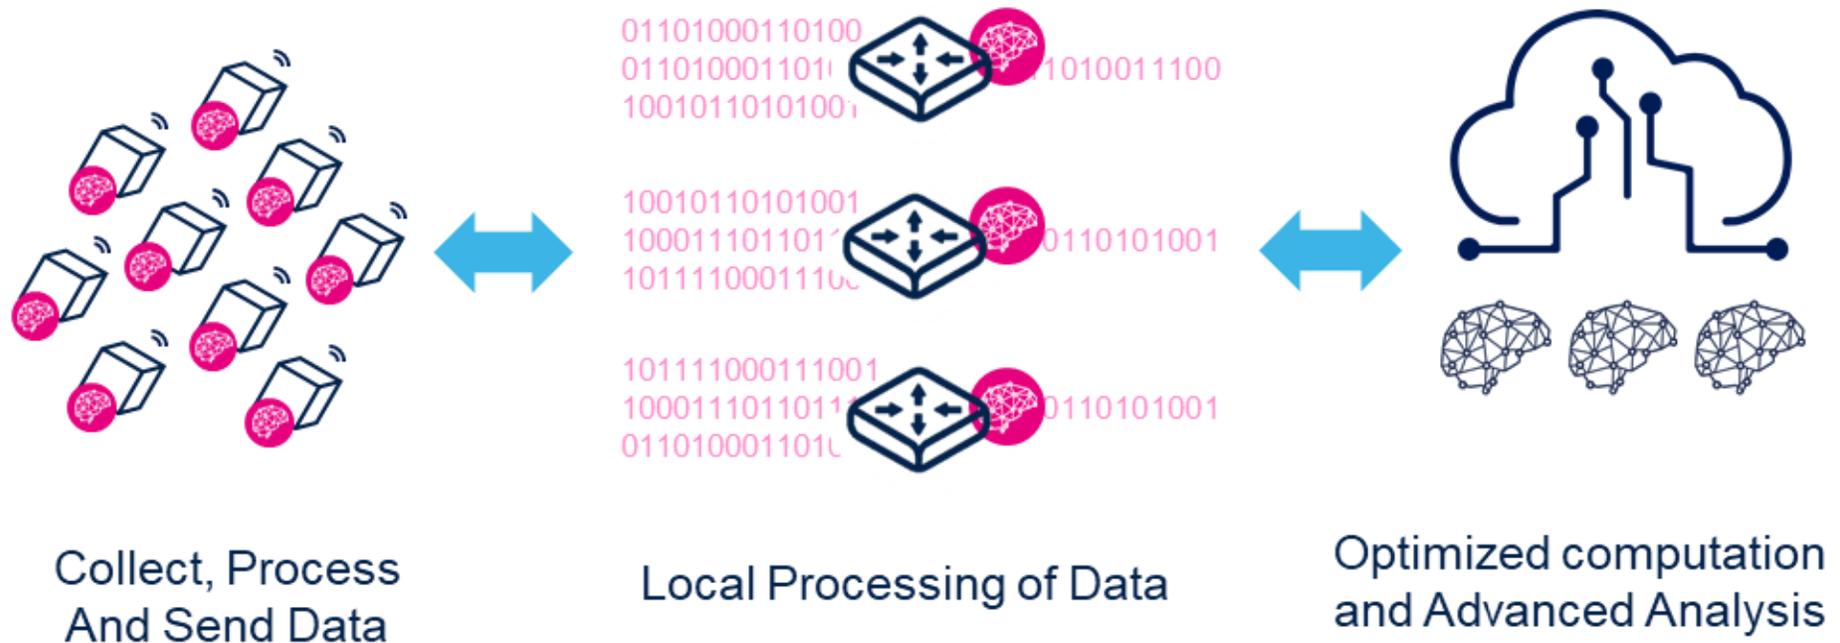

Power consumption

Smart System Challenges: Moving the Intelligence to the Edge

Time-sensitive applications should be locally processed

Opportunity: move computation down to Sensor Nodes with local processing for real-time elaboration and best power efficiency

Complete ecosystem offering by ST

All building blocks for IoT devices	Lower barriers for developers getting started	Lower barriers from prototyping to first product	Enable product & service commercialization
<p>Microcontrollers </p>	<p>Stackable boards & modular SW</p>	<p>Pre-integrated software for vertical applications</p>	<p>Integration of Cloud Provider SDKs</p>
<p>Secure solutions </p>	<p></p> <p>STM32 Nucleo Development & Expansion Boards</p>	<p>  Smart Things  Smart Home & City  Smart Industry </p>	
<p>Sensors & actuators </p>		<p>Development ecosystem</p>	
<p>Connectivity solutions </p>	<p>Form-factor boards</p>	<p>  Code generators  Prototyping software  IDE  Artificial Intelligence toolbox </p> <p>  Debug solutions  Simulation and analysis tools  On-line design tools </p>	 
<p>Power management </p>	<p>  Discovery Kit IoT Node  SensorTile Wireless Industrial Node </p>		
<p>Motor control </p>	<p>  NFC Dynamic Tag Sensor Node  SensorTile.box </p>		
<p>Analog components </p>			

Our technology starts with You
