How To Enable - Turnkey Model

ThunderSoft & mbed

- ❖ ThunderSoft become an mbed Ecosystem partner in 2014
- ❖ 30+ Development Boards
- ❖ 3 Solutions: Wearable Solution, Gateway Solution, Security Solution
- ❖ 5 Projects: smart belt, smart light, trusted gateway,
- ❖ Key Technology
 - ▶ E2E Solution, Security, Connectivity, Sensor/HAL, Hardware Boards

Case Study #1 - Smart Belt

❖ Overview

- ▶ A clip-like BLE wearable device, measure biological information such as physical activity information, heart rate information, stress level, sleep information
- ▶ Transfer the sensor data from device to Gateway and IOT cloud.

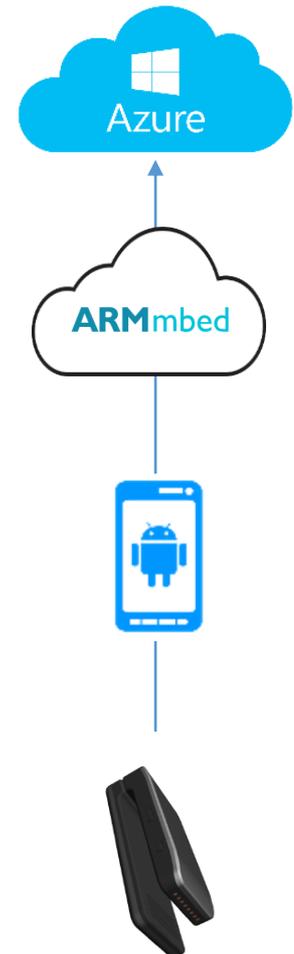

- Cortex M4 + BLE Module
- Accelerometer + Pressure Sensors
- mbed OS 5.4
- Algorithms

❖ Use Scenario

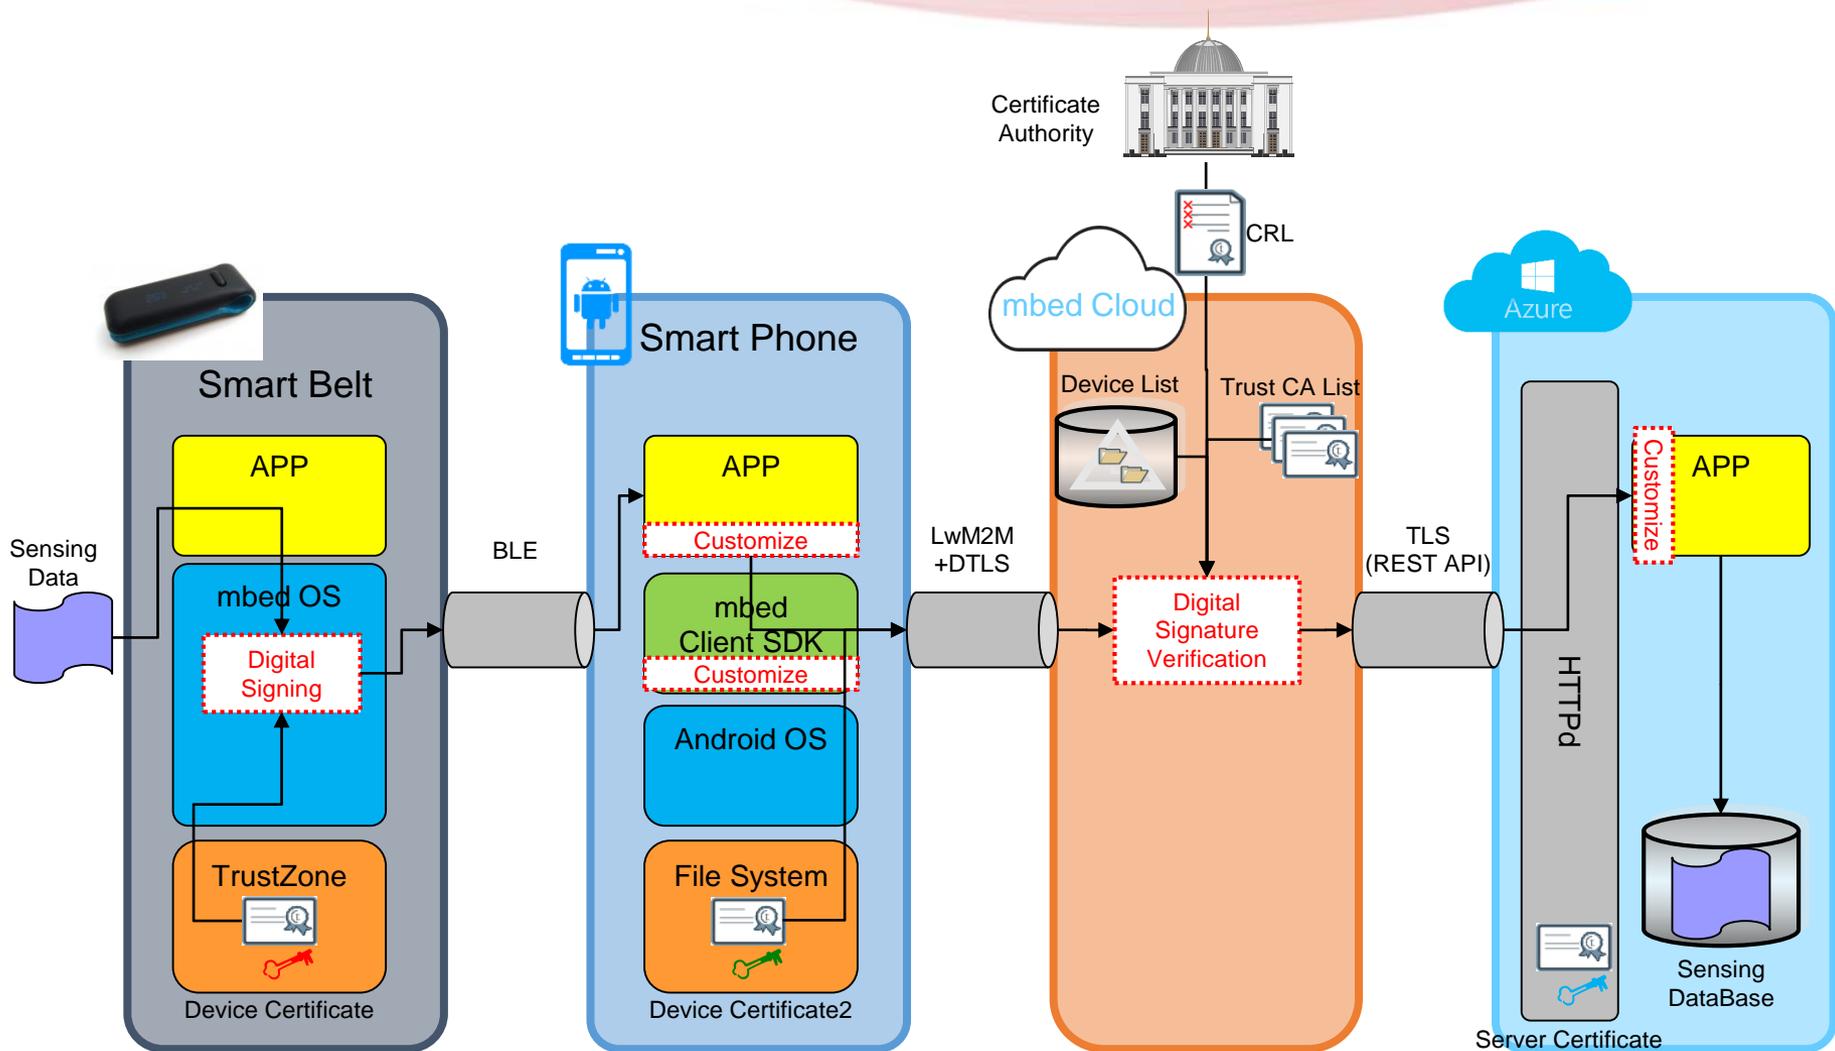

- ▶ wear on the belt, gather and process the the sensor data from the devices
- ▶ place on the cradle, detect the pressure data by connecting a close soft tube which placed under-the-bed

❖ Gateway Type

- ▶ Proxy on smart phone
- ▶ Dedicated smart gateway

Smart Belt Overview

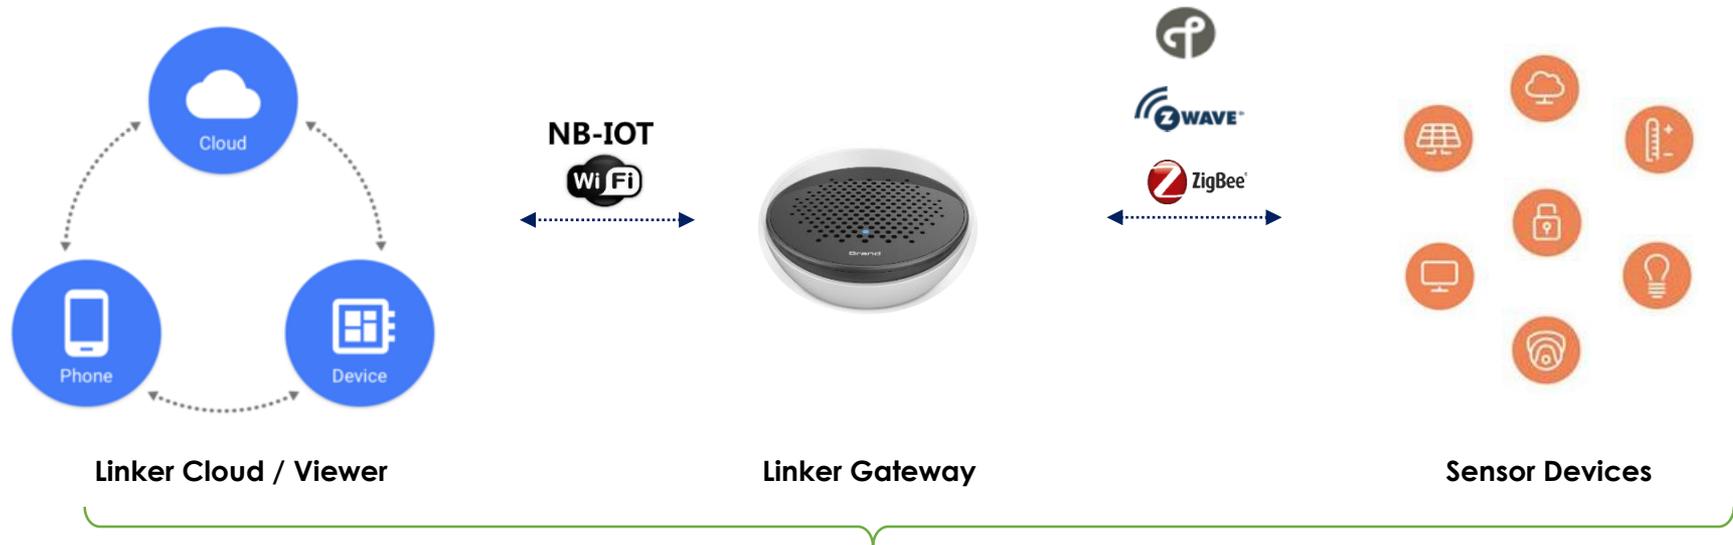

Benefits of mbed OS

- ❖ Open Source
 - ▶ Apache 2.0 license, mbed OS in commercial and personal projects with confidence.
- ❖ Complete IoT Platform
 - ▶ Reduce complexity of software, hardware and connectivity ecosystem.
 - ▶ Maker can focus in its core value of device differentiation feature and web application
- ❖ Rich Drivers and support libraries
 - ▶ Digital and analog IO, interrupts, port and bus IO, PWM, I2C, SPI and serial , a wide range of standard MCU peripherals ready in mbed OS
- ❖ More Communication Protocol Support
 - ▶ The modularity of mbed OS enables it to run on Cortex-M0 to Cortex-M4 based devices, with a variety of communications protocols.
- ❖ Large Community
 - ▶ Many of our components and projects have been contributed by the community
- ❖ Ease of Use
 - ▶ Huge range of code examples, demonstrating how to use each of the APIs.
 - ▶ Application code can remain clean, portable and simple, while taking advantage of security and communications.
 - ▶ IDE and Tools are cross-platform,

Case Study #2 – Linker

❖ Linker – E2E Sensor Network Solution

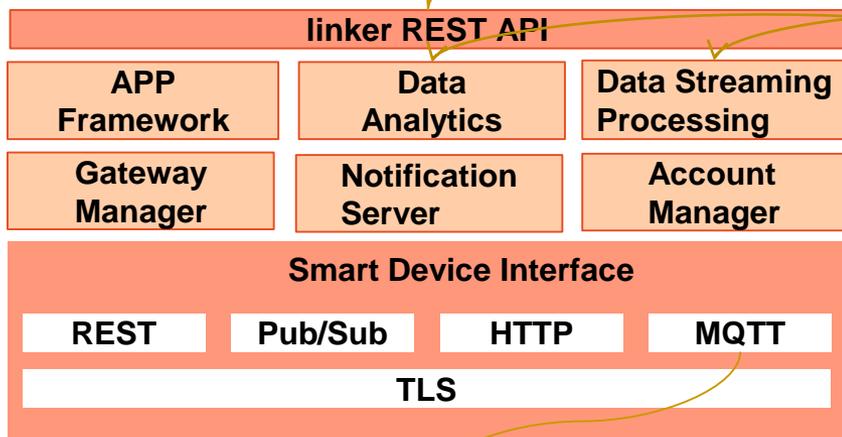

- ▶ Sensors devices, Gateway device, and cloud based device management services.
- ▶ make it simple to move data from sensor to server.

ThunderSoft Connected

Future of Thundersoft with mbed

❖ NB-IoT + mbed

- ▶ Low Power
- ▶ Always Connect
- ▶ 1st NB-IoT Development Board

❖ Security + mbed

- ▶ Trust Execution Environment
- ▶ Secure App, Secure Update
- ▶ Secure Connection

❖ Customers + mbed

- ▶ Health Care
- ▶ Smart Home
- ▶ Smart Factory
- ▶ ...
